

AVULA SAI RAGHU KIRAN

Frontend Developer · React · TypeScript · Next.js · Redux Toolkit · TanStack Query

avulasairaghukiran@gmail.com · +91 8332020170 · Bengaluru · LinkedIn · Portfolio · GitHub

PROFESSIONAL SUMMARY

Frontend Developer with 2+ years building enterprise CRM and SaaS products using React, TypeScript, and Next.js. Specialized in Next.js App Router (v13–15), SSR/SSG/ISR rendering strategies, Redux Toolkit state management, and TanStack Query data-fetching. Delivered measurable production wins — 25% faster rendering, 35% smaller bundles, 96+ Lighthouse scores — and shipped AI-integrated interfaces on Microsoft Dynamics 365. Immediate joiner; based in Bengaluru.

PROFESSIONAL EXPERIENCE

Associate Engineer | Alphavima Technologies Jul 2024 – Apr 2026

- Engineered a React + TypeScript Asset Availability Tracker with reusable component architecture, grid views, and dynamic filters — reduced asset lookup time by 30% for enterprise teams managing 1,000+ assets.
- Architected scalable state management using Redux Toolkit with normalized slice patterns and entity adapters across a configurable Kanban board spanning 3+ Dataverse entities — cut feature build time by ~40%.
- Integrated AI suggestion agents into a CRM chat UI using React with state-managed conversation logs — reduced manual lookup time by ~35% by surfacing automated recommendations inline.
- Built custom PCF Controls in React for Microsoft Dynamics 365 — extended native CRM capabilities with interactive components integrated into enterprise workflows across multiple clients.
- Optimized React bundle size and runtime performance via lazy loading, useMemo/useCallback, and code-splitting — achieved 25% faster render times, 35% smaller bundles, and Lighthouse scores of 96+.
- Monitored and improved Core Web Vitals (LCP, CLS, INP) using Lighthouse CI and Chrome DevTools across all deployed products.
- Delivered responsive layouts supporting 5+ screen sizes — increased mobile session length by 18%.

Full Stack Web Developer Intern | Artificial Techligence Feb 2024 – May 2024

- Built pixel-perfect React components from Figma specs using TailwindCSS — maintained design system token consistency across the full product with zero design regression.
- Developed a support ticket system frontend with React + Node.js REST APIs featuring real-time status tracking — improved team response efficiency by 30%.
- Implemented role-based JWT + OAuth authentication UI in React — secured access flows for 750+ users with clear error states and role-specific interface rendering.
- Contributed to a CI/CD-deployed, AWS-hosted internship portal — shipped a responsive, accessible frontend with scalable component architecture.

Freelance Frontend Developer | Independent Jun 2022 – Jan 2024

- Delivered React-based web applications for local businesses with responsive design, component libraries, and performance optimization — maintained 100% client satisfaction.
- Built foundational expertise in JavaScript, React, and modern tooling (Vite, ESM, bundling) through applied project work.

PROJECTS

HasaBoard — AI-Powered Client Onboarding SaaS React · TailwindCSS · Node.js · PostgreSQL · DocuSeal · Razorpay · Stripe · WhatsApp API [GitHub · Live Demo]

- Built an all-in-one client onboarding platform consolidating intake, contract signing, and deposit payments into a single branded flow — eliminating 3 separate tools from the freelancer workflow.
- Integrated multi-currency payment processing with automated webhook verification; zero payment dispute incidents in beta.
- Automated contract workflows via self-hosted e-signature APIs, saving freelancers \$150+/year in SaaS fees and cutting client onboarding time by 60%.

OpenResumeCraft — Privacy-First AI Resume Builder React · Node.js · Express · Ollama · OpenAI API [GitHub · Live Demo]

- Engineered a privacy-first AI resume builder with 100% local model inference via Ollama — all user data stays on-device with zero cloud exposure.
- Built a deterministic 6-dimension keyword-matching engine and real-time ATS score dashboard — improved simulated ATS match scores by up to 35%.
- Implemented CSS print layout boundary selectors and column-aligned DOCX compilers — reduced document layout parsing and truncation errors by 100%.

TECHNICAL SKILLS

Next.js:App Router (v13/14/15), SSR, SSG, ISR, Server Components, API Routes, Middleware

Frontend:React.js, TypeScript, JavaScript (ES6+), React Hooks, TailwindCSS, HTML5, CSS3, SCSS

State:Redux Toolkit, TanStack Query, React Context API, Redux-Saga

Performance:Core Web Vitals (LCP, CLS, INP), Lighthouse CI, Code Splitting, Lazy Loading, useMemo/useCallback

Backend:Node.js, Express.js, REST APIs, GraphQL, PostgreSQL, MongoDB

Cloud/Tools:AWS, Azure, Microsoft Dynamics 365, PCF Controls, Git, GitHub, CI/CD, Vite

Integrations:Razorpay, Stripe, Twilio WhatsApp API, DocuSeal, Ollama, OpenAI API

Testing:Jest, React Testing Library

EDUCATION & CERTIFICATIONS

Bachelor of Technology 2020

G Pullaiah College of Engineering and Technology, Kurnool · GPA: 7.8

Full Stack MERN Development Certification · GUVI, 2023
