PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience designing and shipping end-to-end web applications across frontend, backend, database, and cloud layers. Proficient in React.js, TypeScript, Node.js, Express.js, PostgreSQL, MongoDB, and REST/GraphQL APIs. Delivered production outcomes in enterprise environments: 30% improvement in asset management efficiency, 25% faster frontend rendering, JWT-secured auth protecting 750+ users, and 40% reduction in feature build time through reusable architecture. Integrated AI suggestion agents, ML models, and third-party APIs (Twilio, Razorpay, Stripe, DocuSeal) into live production systems. Currently building an AI-powered Client Onboarding SaaS (PERN stack) with payments, e-signatures, and WhatsApp/email automation. Open to full-time Full Stack Developer roles in Bengaluru.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, Next.js (SSR/SSG), Redux Toolkit, Context API, React Hooks, TailwindCSS, SCSS

Backend: Node.js, Express.js, REST APIs, GraphQL, Socket.IO, JWT, OAuth, bcrypt, RBAC

Databases: PostgreSQL, MongoDB, MongoDB Atlas, SQL / MySQL

Cloud & DevOps: AWS (EC2, S3, deployment), Azure, CI/CD Pipelines, Git, GitHub, Vite, Agile / Scrum

AI / ML: AI suggestion agents, ML model integration, Azure AI, NLP APIs, Dynamics 365 CRM, PCF Controls

Integrations: Razorpay, Stripe, Twilio WhatsApp API, DocuSeal, Email APIs (SendGrid)

Testing: Jest, React Testing Library, Unit & Component Testing

Performance: Lazy loading, Code splitting, Memoization, Core Web Vitals, WCAG 2.1 Accessibility

PROFESSIONAL EXPERIENCE

Associate Software Engineer · [Alphavima Technologies, India](#) Jul 2024 – Apr 2026

Enterprise AI & software solutions — Microsoft Dynamics 365 & Azure ecosystem

- Designed and built a React + TypeScript Asset Availability Tracker with reusable components, grid views, and dynamic filters backed by RESTful APIs — reduced asset lookup time by 30% for enterprise teams managing 1,000+ assets.
- Engineered a real-time scheduler using React and REST APIs managing 1,000+ assets with live updates — translated complex Figma wireframes into production-ready code with zero design deviation.
- Architected a configurable Kanban board using Redux Toolkit and Context API, reusable across 3+ Dataverse entities — cut feature build time by ~40% by establishing scalable state management patterns.
- Connected Twilio WhatsApp API to Dynamics 365 CRM via Node.js RESTful APIs — enabled real-time customer messaging and eliminated a manual communication step requiring tool-switching.
- Integrated AI suggestion agents into a CRM chat UI using React and state-managed conversation logs — reduced manual lookup time by ~35% by surfacing automated recommendations inline for enterprise users.
- Developed custom PCF Controls and integrated ML models into enterprise workflows using React and Azure — automated 3+ manual business processes within a production CRM environment.
- Optimised React app performance using lazy loading, useMemo/useCallback, and code-splitting — cut render time by 25% and improved Core Web Vitals scores across all devices.
- Led code reviews and maintained Git branching discipline across Agile sprints — consistently shipped full-stack features on schedule while collaborating with backend engineers, PMs, and QA.

Full Stack Web Developer Intern · [Artificial Techligence, India](#) Feb 2024 – May 2024

Tech startup building scalable SaaS products and internship management platforms

- Architected a role-based JWT + OAuth authentication system using Node.js and Express.js — secured data for 750+ users across all roles in a production SaaS environment with zero unauthorised access incidents.
- Built a full-stack support ticket system using React frontend and Node.js REST APIs with real-time status tracking — increased team response efficiency by 30% by reducing ticket routing time.
- Designed UI components in Figma and implemented them in React with TailwindCSS — delivered pixel-perfect, mobile-first interfaces with consistent design system adherence across the product.
- Contributed to the AWS-deployed Career Catalyst Internship Portal using CI/CD pipelines — shipped a production-ready, cloud-deployed portal with scalable frontend and backend architecture.

FEATURED PROJECTS

HasaBoard — AI-Powered Client Onboarding SaaS [In Progress]

[React](#) · [Node.js](#) · [PostgreSQL \(PERN\)](#) · [DocuSeal](#) · [Razorpay](#) · [Stripe](#) · [WhatsApp API](#) · [Email Service](#) · [AI Integration](#)

- Architecting a full-stack AI-powered client onboarding platform on the PERN stack — owning end-to-end development from database schema and REST API design to React UI and third-party integrations.
- Integrating Razorpay and Stripe dual-payment support for INR and international billing — building subscription management and one-time payment flows with webhook-driven state updates.
- Implementing automated WhatsApp and email notification services — triggering contextual messages at each onboarding stage to reduce manual follow-ups and improve client activation rates.
- Leveraging AI to auto-fill onboarding forms and surface completion nudges — reducing time-to-onboard and minimising drop-off at document and verification stages.

TennChat — Real-Time Chat Application

[React](#) · [Redux](#) · [TypeScript](#) · [Socket.IO](#) · [Node.js](#) · [Express](#) · [MongoDB](#) · [TailwindCSS](#)

- Built a full-stack real-time messaging platform end-to-end using Socket.IO, Node.js, Express, and MongoDB — delivering bidirectional communication, JWT auth, and role-based group controls with a fully responsive mobile-first React UI.
- Implemented Redux state management for message history and concurrent sessions — maintained consistent UI across simultaneous users; covered critical components with Jest + React Testing Library tests.

AI Article Summarizer

[React](#) · [TypeScript](#) · [Node.js](#) · [REST API](#) · [Cookie Storage](#)

- Built an AI-powered article summarizer integrating a third-party NLP REST API — delivered summaries in under 8 seconds with cookie-based caching that improved repeat-user efficiency by 15%.

EDUCATION

Bachelor of Technology, Computer Science *Graduated May 2020*

G Pullaiah College of Engineering and Technology

2020–2022: Health recovery during COVID-19. 2022–2024: Freelance full-stack development — delivered client projects in React, Node.js, and JavaScript while upskilling in TypeScript, PostgreSQL, and cloud deployment.

CERTIFICATIONS

- Full Stack MERN Development Certification
