

AVULA SAI RAGHU KIRAN

Full Stack Developer · React · Node.js · TypeScript · Next.js · PostgreSQL

avulasairaghukiran@gmail.com · +91 6300109886 · Bengaluru, India · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years building enterprise CRM platforms and end-to-end SaaS products — owning everything from React/TypeScript/Next.js frontends to Node.js/Express APIs and PostgreSQL data layers. Shipped measurable production wins (25% faster rendering, 35% smaller bundles, 96+ Lighthouse) at Alphavima Technologies, and independently architected full-stack systems including a multi-service SaaS platform (HasaBoard) integrating payments, e-signature workflows, and webhook-driven backends. Comfortable owning a feature from database schema to deployed UI. Immediate joiner; based in Bengaluru.

PROFESSIONAL EXPERIENCE

Associate Engineer | Alphavima Technologies *Jul 2024 – Apr 2026*

- Feature ownership: designed and built a React + TypeScript Asset Availability Tracker end-to-end, including grid views, dynamic filters, and reusable component architecture — reduced asset lookup time by 30% for enterprise teams managing 1,000+ assets.
- API & data integration: architected scalable state management with Redux Toolkit (normalized slices, entity adapters) for a configurable Kanban board consuming data across 3+ Dataverse entities — cut feature build time by ~40% through reusable data-fetching and sync patterns.
- AI-integrated full-stack interfaces: integrated AI suggestion agents into a CRM chat system, building both the conversational state layer and the UI — reduced manual lookup time by ~35% through inline automated recommendations.
- Platform extensibility: built custom PCF Controls in React for Microsoft Dynamics 365, extending native CRM/backend capabilities with interactive components integrated into enterprise workflows across multiple clients.
- Performance & reliability engineering: optimized bundle size and runtime performance via lazy loading, memoization, and code-splitting — achieved 25% faster render times, 35% smaller bundles, and Lighthouse scores of 96+; monitored Core Web Vitals (LCP, CLS, INP) in production via Lighthouse CI and Chrome DevTools.
- Cross-device delivery: shipped responsive layouts supporting 5+ screen sizes — increased mobile session length by 18%.

Full Stack Web Developer Intern | Artificial Techligence *Feb 2024 – May 2024*

- End-to-end feature delivery: built a support ticket system spanning a React frontend and Node.js REST API backend, with real-time status tracking — improved team response efficiency by 30%.
- Auth & security: implemented role-based JWT + OAuth authentication across frontend and API layers — secured access flows for 750+ users with clear error states and role-specific rendering.
- Design system implementation: built pixel-perfect React components from Figma specs using TailwindCSS — maintained design-token consistency with zero design regression.
- Deployment pipeline: contributed to a CI/CD-deployed, AWS-hosted internship portal — shipped a responsive, accessible full-stack application with scalable component architecture.

Freelance Web Developer | Independent *Jun 2022 – Jan 2024*

- Developed responsive and interactive websites for businesses, restaurants, and medical clinics using HTML5, CSS3, JavaScript (ES6+), and React.js.
- Created reusable React components, responsive layouts, navigation systems, image galleries, contact forms, and business-focused landing pages.
- Optimized website performance, mobile responsiveness, SEO fundamentals, and cross-browser compatibility to enhance user experience.
- Managed the complete development lifecycle, from client requirement gathering and UI implementation to deployment and post-launch support, consistently delivering projects on schedule.

PROJECTS

HasaFlow — Visual AI Pipeline Builder & Workflow Orchestration Studio | Next.js 16 (App Router) · React · TypeScript · Prisma ORM · PostgreSQL (Neon) · Zustand · Tailwind CSS · Cloudflare R2 · Razorpay SDK [Repo](#) [Link](#)

- Built a full-stack, drag-and-drop visual workflow orchestration engine using React Flow, enabling users to programmatically design, connect, and execute complex Directed Acyclic Graph (DAG) pipelines for AI processing.
- Integrated Sarvam AI speech and language APIs to run real-time Speech-to-Text (STT), multilingual machine translation (across 10+ Indic languages), and natural-sounding Text-to-Speech (TTS) synthesis.

- Engineered a custom topological sort-based backend execution engine resolving and running asynchronous multi-node data pipelines with granular, node-level execution log capture.
- Implemented a secure, credit-based billing system integrating Razorpay checkout, verifying webhook/payment signatures server-side, and enforcing strict REST API payload/rate limits (Token Bucket middleware) to prevent API abuse.
- Designed and deployed the platform with NextAuth v5 session guards, robust database cascading rules, and secure Cloudflare R2 asset storage using pre-signed AWS S3 SDK endpoints.

OpenResumeCraft — Privacy-First AI Resume Builder (Full Stack) | React · Node.js · Express · Ollama · OpenAI API

[Repo](#) [Link](#)

- Local-first backend: engineered a privacy-first AI resume builder with a Node/Express backend running 100% local model inference via Ollama — all user data stays on-device with zero cloud exposure.
- Matching engine: built a deterministic 6-dimension keyword-matching engine and real-time ATS score dashboard — improved simulated ATS match scores by up to 35%.
- Document pipeline: implemented CSS print layout boundary selectors and column-aligned DOCX compilers on the backend — reduced document layout parsing and truncation errors by 100%.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, TanStack Query, TailwindCSS, HTML5, CSS3/SCSS, Shadcn

Backend: Node.js, Express.js, REST APIs, GraphQL, JWT/OAuth Authentication, Webhook Integrations

Databases: PostgreSQL, MongoDB — schema design, query optimization

Cloud & DevOps: AWS Amplify, AWS CodeCommit, AWS S3, Azure Functions, CI/CD, Git/GitHub, Vite, Microsoft Dynamics 365, PCF Controls

Integrations: Razorpay, Twilio WhatsApp API, DocuSeal, Ollama, OpenAI API

Performance & Testing: Core Web Vitals (LCP, CLS, INP), Lighthouse CI, Code Splitting, Jest, React Testing Library

EDUCATION & CERTIFICATIONS

Bachelor of Technology2020

G Pullaiah College of Engineering and Technology, Kurnool · GPA: 7.8

Full Stack MERN Development Certification — GUVI, 2023
